SUMMARY

A hard-working and creative Master of IT graduate with a great eye for detail, keen enthusiasm in user-centred design and understanding of usability principles. A self-taught front-end developer with the passion to learn new technologies every day and is always up for new challenges. With every line of code, I strive to create top quality and high-performance web applications.

WORK EXPERIENCE

MIRK
Front-end Developer - Internship
Aug 2019 - Nov 2019

- Developed company's website by using HTML, CSS, JavaScript as well as Vue.js framework from static concepts with a high level of professionalism and expertise
- Collaborated directly with the UI/UX designer to ensure designs and animations were efficient
- Write efficient codes to ensure integration of user-facing elements with server-side logic and optimal performance of the application
- Conducted testing in multiple browsers to identify bugs and ensure cross-browser compatibility

CAPSTONE VIETNAM
Graphic designer - Full-time
Aug 2015 - Apr 2017

- Created the overall layout and production design such as brochures, banners, flyers, magazine covers, annual reports, advertisements, and other communication materials
- Created HTML email templates and newsletters for e-mail marketing campaigns
- Designed and developed the company's blog website using WordPress
- ★ **Award: Employee Of The Year**

EDUCATION

WESTERN SYDNEY UNIVERSITY
Master of IT
2018 - 2020

Relevant Coursework: Object-Oriented Programming, Web Technology, Web Engineering, Mobile Computing, Big Data, IT Project Management, Content Management Systems and Web Analytics.

Achievement: Distinction (GPA: 6.1/7)

PROJECTS

Covid-19 Tracker
2020

A ReactJS-based project acts as a live coronavirus dashboard to track the current impact of the COVID-19 pandemic and its spread throughout the world. It offers users map view and graphical displays for COVID-19 disease global spread, including total confirmed, active, recovered cases, and deaths.

Technologies Used: React, Chart.js, Leaflet, Material-UI

Live site: https://dangnhz.github.io/covid19-tracker

React Music
2020

A single-page web application made with React. This app enables you to search and play music from YouTube quickly without any ads. You can also save your favorite songs and view your recently played tracks.

Technologies Used: React, Redux, Framer Motion, Material-UI, SCSS

Live site: https://dangnhz.github.io/react-music

InstaCard Maker
2020

A simple web application for creating beautiful images with impressive background blur effect from Instagram post's URL by just one click.

Technologies Used: Vue, HTML Canvas, Instagram API

Live site: https://instacard.now.sh

Mirk.co
2019

This company's landing page is the creation of a simple and clean design with impressive animations and page transition effects. The client-side was entirely modularized with **Vue.js**, which is awesome for code maintenance and scalability. The biggest challenge in this project is that it has so many different templates, making everything run smoothly and cohesively was a big win.

Technologies Used: Vue, Bootstrap, GSAP, Scroll Magic

Live site: www.mirk.co
